Proficient: JavaScript, Python, HTML, CSS

Familiar: Xamarin, C#, PHP, Swift

Libraries & Frameworks: Angular, JQuery, Bootstrap, React.js, Flask, Django, Express.js, AJAX, Sockets.io

Databases & Servers: Node.js, SQL, MongoDB, Mongoose.js, Apache

Tools & Version Control: Git, Terminal, Atom, Visual Studio Code, Visual Studio, Xcode

Methodology: MVC, OOP, RESTful Routing

Development Experience

Athlete Intelligence by i1Biometrics – Kirkland, WA

Software Developer

Apr 2017 – May 2018

- Builds out internal and consumer facing features on the web platform in Angular and C#
- Collaborates with Sales and Marketing to maintain and support the current customer facing marketing website written in Angular
- Created and redesigned the store and buy process on the web platform for a more responsive and atheistic look using Bootstrap and Angular
- Migrated company's website from an external CMS system, WordPress, and brought it in-house for easier content management
- Helped implement features, pages, and UI in the multiplatform Xamarin mobile application using XAML and C#
- Redesigned the user interface and user experience of minor components of the web platform
- Executed test cases to ensure production requirements are achieved to meet consumer expectations

Freelance – Bellevue, WA

Oct 2016 – Mar 2018

Front and Back-End Web Developer

- Independently creating and implementing a new lightweight design for a company's website and online shop using Bootstrap
- Introduced a new UI for a property management company's website as well as implemented a backend and admin portal using Angular.JS in the front-end and Node.js in the back
- Performed website maintenance and support for a small consulting company that was using PHP and cPanel

Projects

OW Sens – Front-End Angular Project

July 2017

- Created a web application to help calculate and find the proper sensitivity for gamers who play Overwatch. Focuses on the use of components and the passing of data using Angular and Bootstrap.

SHP – MEAN Full-Stack Webpage and Application

Dec 2016

- Redesigned a company's website by creating a single-page design. However, the client wanted more functionality and wanted to be able to add their own content without going through a web administrator. As a solution, implemented a backend and an admin page using a NoSQL database with RESTful APIs, AngularJS, and NodeJS.

PotLuck – Python Full-Stack Web Application

Aug 2016

- Developed an application for people to share recipes. Users are able to post, favorite, create instructions for the own signatures dishes. Planned and implemented within a week, focusing on the use of Python, Django, and a SQLite database.

Education

Coding Dojo – Bellevue, WA – 2016

- Graduated at the top of the class and received Black Belt Certification (+9.5/10) for a 4.5 hour exam for MEAN, Python, and Swift
- Spent 60+ hours a week learning and understanding the syntaxes of three different programming languages, algorithms, and data structures
- Became a Teaching Assistant and worked with new students by answering questions and giving small lecture with live coding demos

University of Washington, College of Arts & Sciences – Seattle, WA – 2016

- Graduated with a Bachelor in Communications with a Certificate in Sales from the Foster School of Business
